

NParks invites you to visit Kranji Coastal Nature Park

When: Saturday 16 Jul 2022
Time: 3:30pm (Bus leaves MBS at 3:30pm sharp)

Kranji Coastal Nature Park leverages on nature - based solutions in its coastal protection measures. The rock revetment is implemented between the original mangroves and a new vegetation belt to slow down waves, encourage sediment accretion and natural recruitment of mangrove saplings. This provides additional habitats for biodiversity and acts as a buffer area against rising sea levels and storm surges. The nature park is also an educational and recreational space for visitors to learn more about wetland flora and fauna as well as to immerse themselves in nature. Participants can glean insights on key lessons learnt from this site and the efficacy of such an approach.

Further information can be found at <https://www.nparks.gov.sg/gardens-parks-and-nature/parks-and-nature-reserves/sungei-buloh-wetland-reserve>

This site visit is organised by PUB and NParks as part of the WCRP Sea Level Conference.
